HISTORIC INFORMATION EXMOUTH WINDMILL SITE

"Point House" enjoys glorious history having been constructed on the " historical Exmouth Windmill site" "Point house" is also believed to have been constructed from some of the salvaged materials from the old Windmill. In 1818 a violent storm caused the windmill's sails to go around so fast the working parts within caught fire and the vanes eventually blew off. The 1825 Rent Book then stated that the windmill was void, in other words not working. In 1829 it was recorded that the mill machinery was known to be in fair condition but not self turning and it was possible to turn the machine with the aid of a donkey ! In 1831 Marchant died and bequeathed his shares to his son, who then sold them to Webber who had already laid out a considerable sum in commencing the building of three dwellings.

In addition to these houses, during the next four years Webber also constructed two more houses and a rope walk with all associated buildings for the business of rope making. Webber died in 1835 and then Pearce sold his shares to Webber's estate. Webber had left the original three houses known as Thistle Cottage, Kenwyn House and " POINT HOUSE " to his brothers.
